

Martinelli Sound Co.

FIRENZE

Wood Horn Bass Reflex Floor standing Loudspeaker

Design:

3-Way Loudspeaker with Coaxial Driven Horn & Bass Reflex Cabinet.

Frequency Response:

32Hz-20kHz +/- 3dB.

Sensitivity:

97dB @ 2.83volts / 1 meter.

Power Handling:

125 Watts Maximum Continuous (500 watts peak).

Nominal Impedance:

8 ohms.

Woofer:

TAD TL1101H Ultra low distortion cast frame woofer 11".

Midrange & Tweeter:

BMS 4592 2" Neodymium Coaxial Driver.

Wood Horn:

500Hz Exponential Radial Horn with billet aluminum driver mount.
14" x 9" Shown in Bubinga.

Cabinet:

Bass-Reflex rear ported cabinet. 3.5 cubic foot volume.
Shown in Kevazinga (bubinga) with lacquer.

MF Crossover:

1250 Hz

HF Crossover:

6.5k Hz

Dimensions:

49" tall x 16.5" wide x 13.75" depth 105 lbs.

Introducing the Firenze

The Firenze is a 3-way High Efficiency Loudspeaker, exhibiting exceptionally clear tone and clarity. The exponential horn, with it's coaxial driver, produces excellent phase coherence. High dynamics and low distortion are capable with two subsystems each covering a smaller frequency range. Working together as one point source delivers perfect time alignment without the problems of multi-source interference.

Martinelli Sound offers this, and other fine designs in rare and exotic raw veneer to compliment any decor. Wood horns are produced with select hard woods, rare and exotic, for both pure tonality and quality. The throat transition is machined from billet aluminum and secured with stainless steel hardware

*Shown in Bubinga, complete Pair
\$6,750.00*
